

## Fog collection prototype

Where it has been implemented:

Municipio de Sichoque, Colombia

Proponents: UNAD

(UNAD, 2017)

(UNAD, 2017)

**Description:** This fog collection system was built as a prototype with the aim of testing the effectiveness of different fabrics for fog collection in rural areas of Colombia. The most positive result was obtained by the raschel mesh.

**Interesting feature:** Although the raschel mesh had a 1 capture fog water, the other two fabrics can also be used were available.
