

Technologies for greywater treatment

Artificial Wetlands

(Laderna Sur, 2021)

(Universidad de Costa Rica, 2017)

Description	Advantages	Disadvantages
It works through the use of plants with the ability to absorb organic matter and other compounds that we want to remove from wastewater.	It is more economical than other forms of treatment and an aesthetic element can be preserved in the treatment plant.	It is demanding in the monitoring of plants and does not remove all waste.
