Mini grids for safe and affordable water supply ...

Patuakhali - 8600, Bangladesh

In Bangladesh, approximately 73 million individuals still lack access to safe water within their own homes. Merely 2% of rural households have the privilege of obtaining water through a piped water supply, meaning that an overwhelming 98% of rural households in Bangladesh are deprived of this convenience. The arduous task of collecting water falls on women and girls, who spend up to two hours each day engaged in this chore. M...
