Payment for environmental services

Water Fund

Where it has been implemented: Sierra de las Minas, Guatemala

Proponents: Defensores de la Naturaleza, INDESA, Coca Cola, Cervecería Centroamericana

Requirements for implementation

Degree of difficulty

To assess the degree of difficulty of implementation, with a score being higher difficult than 1 and being the easier.

Description: This system is based on annual contributions from users of water from the Sierra de Las Minas, with differentiated rates depending on the use of each actor. The actors that can be distinguished are large companies, farmers and private users from their homes. It is an excellent success story.

Interesting feature: Its execution scheme is private-private that the government is not a key actor within the management. A good example of autonomy for the conservation of a Guatemala.
