

(Aqualonis, 2023)

Fog Capture

Fog collectors

Where it has been implemented:

Alto Veladero

Proponents: Aqualonis

Requirements for Implementation

(Aqualonis, 2023)

Description: This catchment system seeks to help meet the water needs of the community of Alto Veladero, since unfortunately its surface waters are mostly contaminated. Through Aqualonis technology, the community has the ability to harvest rainwater in a sustainable way.

Interesting feature: Although the construction company works in different places, each system has its special character.
