LifeBox

11519, Egypt

LifeBox, an alternative solution of sustainable decentralized infra-structure that provides both clean energy and safe water from solar power at a reasonable price empowering farming and tourism business in less-served communities. LifeBox is a solar-powered, all-in-one, self-contained and fast-deployable unit made of reused or recycled shipping containers delivering clean electricity, purified or desalinated water. It acts as a gree...
