

Hot water for showers and air heating system...

C1041 AAO Buenos Aires, Argentina

This is a socio-environmental project which objective is to provide hot water for showers and air heating systems for all types of homes, harnessing the clean and sustainable energy of the sun. To do this, a solar water heater and a solar heater were created, made with recyclable and low-cost materials, which reduce the consumption of traditional fuels and contribute to caring for the environment. In addition, in vulnerable ...
