

# Rain Collection System

1000 Skopje, North Macedonia

In Skopje, the average annual precipitation in 2020 was about 600 mm, so a roof with 100 m<sup>2</sup> can collect an average of 60,000 l of water.

Keeping this in mind, the students of Vlado Tasevski want to reduce the use of potable water for irrigation of the areas around the school...
