

Agro Nayade, 2020

## Sprinkler irrigation

Where it has been implemented:  
Santa Cruz, Bolivia

Kirti Jagran, 2020

**Description:** The mechanism works through a network of pipes that transport water to the sprinklers, which use pressure to trigger it. Basically, it seeks to imitate the way in which rain would naturally irrigate these plants. In this case, the implementation of this irrigation produced better quality potatoes and quadrupled the production compared to traditional irrigation.

**Interesting features:** this type of irrigation ensures to be in the entire plant and provides the necessary moisture to the e
