

Villagers with Source Hydropanels at Galoa District School in Bua. Picture: SUPPLIED

## Solar-powered water production unit

Galoa, Fiji

Galoa District School located in Bua, Fiji, has been provided solar-powered water production units that produces pure and clean water out of thin air. The school previously did not have access to clean, safe drinking water. Hydro panels create approximately 4-10 litres a day, depending on weather conditions. The school was provided 2 hydro panels, but given the large number of students they would need more pa...
