

“Social plug-ins” that provide hot shower...

C1041 AAO Buenos Aires, Argentina

The purpose of this project is to meet people's basic needs in slums by harnessing waste recycling and "home" use of renewable energies. Sumando Energías is dedicated to installing what they call "social plug-ins". They offer workshops so that by means of using aluminum cans, plastic bottles, PVC pipes, Styrofoam, and tetra paks, volunteers and people interested in different disciplines can learn how to use solar en...
